

INTEGRATIONS

Most companies have a stack of HR software and tools to help them manage their employees' hire-to-retire lifecycle. You can seamlessly integrate The Predictive Index software into the systems and workflows you use every day.

WORKFLOW

EMPLOYEE PROFILE

Get connected.

Our [API](#) and [Open Invitation](#) options make it easy to automate the delivery of assessments, retrieve PI data, and display results from directly within your HR systems.

The Predictive Index API

Programmatically trigger assessment delivery and retrieve PI data from within your existing applicant workflows or business processes with our APIs. Bring employee-facing applications to life with behavioral data from PI.

Open Invitation

Create custom assessment links and landing pages that can be inserted into any workflow or email with Open Invitation. Keep things organized by creating specific links for different teams, positions, or end-users.

Need development resources to set up your PI integration?

Just Ask! We will connect you with integration partners who are ready and waiting to help you.
